

JET ENGINEERING

Consulting Civil Engineers, Planners & Surveyors

COMPANY PROFILE

Based in the Heart of Silicon Valley, JET Engineering offers a complete range of civil engineering, land planning and land surveying Services to public agencies, engineers, architects, land owners and developers on a variety of projects.

On projects large and small, principal commitment and involvement are the key elements to project our success. Our broad experience from Public Works Administration in the public sector, combined with our experience as private Engineering Consultants and Developers, brings our highly qualified and unique perspective to projects that few firms can offer. Our unique blend of experience always provides our clientele with cost-effective and high-quality solutions to the challenges of each project.

JET Engineering is skilled in the design and management of a wide variety of projects including transportation improvement projects, utility infrastructure, multi-family residential developments, commercial & industrial developments including roadway design and geometrics, water and wastewater conveyance systems, storm water management, erosion and sediment control, grading, flood plain analysis, estimating and permitting. Our firm has significant experience in public project development, scheduling, design, preparation of bid documents, and construction. Some of most recent work includes several highway and interchange projects, local roadway and utility improvements, and two major expansions of the San Jose International Airport.

JET Engineering's Principal, James Thompson, has often acted as the prime consultant contact in managing complex projects, large or small that require interaction and coordination with multiple agencies and various design disciplines. Jim has strong project management expertise and strict quality control guidelines that result in timely and well-organized construction document packages. As project manager, he provides a convenient and reliable single point of contact for all communication between clients and the design team.
